

**Quarterly Division Award**  
**Public Works Department**  
**Facilities Division**

On behalf of the Community and Economic Development Department, I would like to nominate the Facilities Division for Division of the Quarter. In the past three months they have managed to completely renovate our department offices in City Hall. Under the guidance of Jake, Fabian and Chad, they accomplished a technically difficult project, building offices for most of our staff, and reconfiguring the public space, copy room and kitchen in a relatively short time.

I had reason to come in on Fridays or Saturdays during the remodel and they were at work on the project, even then. Jake and his staff were always available to answer specific questions and handle problems. We were a difficult client, and they handled us well. They are now working on the CPD/Animal Services building.

The strength of an organization is only tested when they confront major challenges and indeed, some major challenges arose in the course of the renovations. Their speed, creativity and genuine concern to create a space that we love to work in is truly remarkable. For this reason I submit this Division for Division of the Quarter.
